

Solutions for your Windows

From blinds and shades to shutters and custom draperies, we have the right window treatments for any living space. As emphasized in our *Design Ideas of the Month* email, we can provide you with the right window treatment for you and your home.

Are you looking for privacy and light control? How about a wood or faux wood blind? Wood and faux wood blinds are a great option for most living areas. In a bedroom, living room, or family room, we would recommend any wood blind. Faux wood blinds would be great in a bathroom or kitchen where there is more moisture.

Looking for something more energy efficient? We have many solutions! From the above wood and faux wood blinds to shutters to various types of shades, we have multiple options available. From solar and roller shades to pleated and cellular shades, you can't go wrong. Helping to keep your heat or air conditioning in your home, these treatments will help in lowering the amount of energy that leaves your home through your windows.

What is it you are looking for? Let our Designers help you stay within budget and find the perfect treatment for your living space! Stop in or make an appointment to view sample window treatments and receive further information.
